### OBJECTIVE

2nd-year B.Tech CSE student (8.0 CGPA) who has shipped four full-stack AI products in under a year, including a national-hackathon career-guidance platform built with Gemini AI, Next.js and Prisma. Seeking to grow into an AI/ML engineering role by building intelligent, production-ready solutions.

### EDUCATION

|                                                                                   |                                           |
|-----------------------------------------------------------------------------------|-------------------------------------------|
| <b>B.Tech, Computer Science &amp; Engineering</b> — Malla Reddy Deemed University | 2025 – 2029 (2nd Year)   <b>CGPA: 8.0</b> |
| <b>Intermediate (XII)</b> — Vidya Vikas Junior College                            | 2023 – 2024   <b>63.5%</b>                |
| <b>Secondary (X)</b> — Loyola High School                                         | <b>85%</b>                                |

### TECHNICAL SKILLS

|                            |                                                                   |
|----------------------------|-------------------------------------------------------------------|
| <b>Languages:</b>          | Python, JavaScript, C, SQL                                        |
| <b>Frontend:</b>           | React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion       |
| <b>Backend &amp; Data:</b> | Node.js, Express.js, Prisma ORM, MySQL                            |
| <b>AI &amp; Cloud:</b>     | Gemini AI, ChatGPT API Integration, Google Cloud Foundations      |
| <b>Tools &amp; Deploy:</b> | Git & GitHub, JWT, Chart.js, Canva, Netlify, Vercel, GitHub Pages |

### EXPERIENCE

|                                                                                                                        |                         |
|------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>Full Stack Development Intern</b> — CodeAlpha                                                                       | May – Jun 2026   Remote |
| • Completed a remote full-stack development internship, applying hands-on software development under real constraints. |                         |

### PROJECTS & HACKATHONS

|                                                                                                                                   |                                |
|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>AI Career Guidance Platform</b> — Next.js, Gemini AI, MySQL, Prisma ORM                                                        | IGNITE 2K26 National Hackathon |
| • Built a quiz-based AI career analysis tool generating personalized roadmaps and mentor connections in a 24-hour hackathon.      |                                |
| • Designed a full admin panel with role-based user management; integrated Gemini AI for context-aware recommendations.            |                                |
| <b>Campus Helper</b> — React.js, Node.js, MySQL                                                                                   | AI-Thon — 1st Place Winner ■   |
| • Built a responsive student-facing web platform for campus services under a timed hackathon, placing 1st among competing teams.  |                                |
| <b>StudyLife AI</b> — React.js, Node.js, Express, JWT, Chart.js                                                                   | Novus Hackathon                |
| • Built a Pomodoro study planner and expense tracker with real-time analytics dashboards, JWT auth, budget alerts, and timers.    |                                |
| <b>Campus AI Assistant</b> — React.js, Node.js, Gemini AI                                                                         | Personal Project               |
| • Built an AI-powered chatbot to answer student queries on university info, timetables, and campus services using the Gemini API. |                                |
| <b>Anwar's Arabian Restaurant Website</b> — HTML5, CSS3, JavaScript                                                               | Netlify & GitHub Pages         |
| • Built a high-performance responsive restaurant site with interactive menu and WhatsApp order flow.                              |                                |

### CERTIFICATIONS & WORKSHOPS

- **Python for Data Science** — Saylor Academy (67-hour course, Certificate ID: 6007024143SA, Grade: 77.69%)
- **Google Cloud Computing Foundations Certificate** — Google Cloud
- **Google Gemini Academy** (upEducators) · **AI Tools & ChatGPT Workshop** (be10x) · **C Programming** (PR Softwares)
